## Roomba®

Робот-пылесос Roomba® j9 убирает эффективнее, автоматически определяя, где нужно почистить в первую очередь.

С помощью функции Dirt Detective на базе iRobot OS робот извлекает информацию из истории уборки и самостоятельно расставляет приоритеты уборки, регулирует мощность всасывания и количество проходов уборки.

Объезжает препятствия  
Обнаруживает и избегает препятствия на своем пути, такие как обувь, носки, миски для домашних животных и провода.

### Thoughtful features for careful cleaning

In Careful Drive mode, the thoughtful and sensitive Roomba® j9 slows down to carefully navigate along walls and furniture, so you don't ever need to worry about bumps or dings. And, with power boost technology, suction is automatically increased to clean even deeper into carpets.
